SKILLS

Python

MySql

HTML5/CSS

JavaScript

EDUCATION

M.sc (computer science)- 6.42 CGPA

DAVANAGERE UNIVERSITY

2019-2022

BCA - 65.75%

B.S.CHANNABASAPPA.F.G.C

2014-2017

PUC- 57%

ST. JOHN'S P U COLLEGE

2014

S.S.L.C - 77%

SRI SOMESHWARA VIDYALAYA

2012

TOOLS

V S Code | Oracle-11g | Git |
Node Js | Apache-server

CERTIFICATION

MySql - Simplilearn.com

Python - IBM free course

PROFESSIONAL-SUMMARY

- Motivated and diligent individual with a sound foundation in HTML5, CSS and JavaScript. Proficient in Python programming language.
- Winner of 'Best Presentation' at "15th KANNADA SCIENCE CONFERERENCE" held for the university students. (sept 2019)

PROJECTS

Image Post-Processing And Checking Originality Of Digitally Converted Forged Text

Msc   2022

- "Handwritten Text Recognition" is one of the pattern recognition. The reason for using pattern recognition is to sort or group the information/object of one of the classes or then again clarifications and vice-versa.
- The utilization of digital images of handwritten authentic record has got better known in ongoing years.
- Handwritten to Digital text conversion tool is planned utilizing digital image processing strategy to make information conversion
- "This is an easy way to record the data by capturing the image of handwritten font/document and save it in image format which convert handwritten data into image based content i.e. 'Optical Character Recognition' and then analyze weather the content is being firmed by digital system/manually written.
